I WOULD LIKE TO BECOME A TEACHER IN FUTURE

Being a teacher is one of the most important roles anyone in this world can play. Without teachers all the different jobs would not be around. Why? Because without teachers, no one would be smart enough to operate and do those jobs. Education starts from when you are a baby, and your teachers are your mother and father. You can learn words from them. Then comes the teachers in school, which teach you English, Mathematics, Science, etc. Everyday you learn something new. There things you have to learn in order to prepare you for life.

Why I would like to become a teacher in future is because I love hearing other people's ideas and perspective about things and a teacher can do that by listening to her students. I also would like to become a teacher because then I can interact with people that are younger than me and, who knows? They could be miles more creative and smarter than my generation. Another reason why I aspire to become a teacher is, because I believe that it's not just students learning from teachers every day, but teachers could be learning from their students each day as well. They could find a new way of looking at a problem that could be a lot easier than your way that you have used for many years.

People sometimes like to spend time with people that are younger than them because they might feel pressured to test their knowledge when people of their own age are around. Usually people younger than you are more care free and relaxed. I am one of those people.

BEST MOM EVER

My mum is the best gift from God, my family and I are so lucky to have her. She took care of me. I love her so much she has a special place in my heart. She is the funniest person I have ever met. When I'm sad she makes me smile, she doesn't like seeing people sad. My mom is my teacher, doctor, coach, and best friend. She's my teacher when it comes to my studies. She is my doctor when I'm sick. She's my coach when I play sports. She is my best friend in my heart.

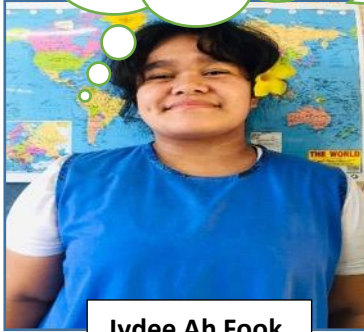

She encourages me to do well in my study also in sports. She knows what's good and bad for me. Behind the scenes of every good thing I achieve there's always my mom there rooting, supporting, and cheering for me.

She has taught me so many things, like how to care and love for other people, how to play sports, how to protect myself and so many other good things. If it wasn't for her I wouldn't been the strong young woman when I am today.

I look a lot like my mom and I want it be like her when I grow up. My mom spoils me a lot because of course I'm her favorite. I love her so much and when I grow up I want to make her proud. Make her the happiest mum alive.

Never ever take revenge as revenge is a fool's game

Arthur Samuelu

Christopher Malielegaoi

Milk can become yogurt. Yogurt is more valuable than milk. Milk can even become cheese and cheese can be more valuable than yogurt or milk. Grape juice can become wine and wine is considered more prized than the humble juice from whence it came. It doesn't matter the person we are today, because we are capable of change and becoming a better version of ourselves with every tomorrow.
